Press Release

Megger is a leading worldwide manufacturer and provider of test and measurement equipment to the electrical industry, with distribution and technical sales offices throughout the world providing local customer support. Due to the constant demand from local markets and the ever increasing requirements of the region, Megger decided a regional office was needed that will cover the Middle East and Africa and this office is based in Bahrain. "Bahrain is an ideal location for us, the growth within the region is astounding" Nick Parton, Sales Manager for Megger Limited MEA announced." Megger have had a presence in the region for the past 30 years but the increase and demand for our product range convinced us we needed to be more prominent. Our local team has doubled in the past 6 months and the knowledge our technical staff for the products we sell and the region is paramount to our growing success."

Members of the Megger Regional office will be participating in Power Generation Middle East this October. Three main product areas will be showcased at the event. The IDAX and FRAX products for transformer testing and insulation diagnostics utilizing Frequency Domain Spectroscopy. Cable Fault Location products to minimize customer minutes lost using the latest in TDR and Impulse Current techniques. The launch of Megger GOOSE Configurator providing the capability for testing the protection and control applications in substations utilizing the IEC61850 standard in an innovative way that addresses the needs of both the protection and control engineers.

The Megger product range includes some of the latest developments in electrical safety testing, cable fault location, protection testing, circuit breaker testing, earth, transformer and battery testing, power quality analysis and insulation diagnostics.
